Background and Alternatives Explored:

Missoula Water proposes to hire IMEG Corp. to provide design and construction administration services for the installation of a Pressure Reducing Valve (PRV) and approximately ½ block of existing Kalmein water main adjacent to the proposed PRV. This PRV would provide a redundant water feed to a large section of the lower Rattlesnake and provide increased flow rates at fire hydrants in this area.

Financial Implications:

\$35,370 from the Water Enterprise Fund
