Background and Alternatives Explored:

The City of Missoula municipal greenhouse gas emissions inventory is used to measure progress towards the goal of carbon neutrality in city operations by 2025. In addition to measuring progress, this report helps the City of Missoula make informed decisions on where to focus climate action strategies. The data provided in this presentation is based on operational carbon emissions from the City of Missoula facilities and activities, and does not include community greenhouse gas emissions.

Panelists Include:

- Leigh Ratterman, Climate Action Specialist
- Charlotte Psick, Climate Action Program Coordinator

Financial Implications: None – Informational Only
