Background and Alternatives Explored:

Although two replacement cores were identified in the FY22 budget, this request will utilize available funds to purchase a single, larger core. The new, larger core will replace an older core that contains three servers and will include an additional three servers of storage capacity for future growth.

Financial Implications:

The total purchase cost of \$255,080.05 will be funded through a combination of approved and funded FY22 CIP and FY22 ARPA budgets.
