Subject: Comment on proposed cannabis regulations

Cassie,

The Missoula Valley Water Quality District appreciates the opportunity to comment on the proposed regulations. Because groundwater and surface water can potentially be impacted by various forms of manufacturing, especially where floor drains and chemical storage exist, we request that any new manufacturing business consult the District prior to licensure (via the Accella Automation platform) so we can assess any potential risks to water resources and address any storage or permit requirements with the applicant.

Thank you
Todd
