Background and Alternatives Explored:

The City periodically requires Phase I Environmental Site Assessments, Phase II Environmental Site Assessments, and other professional services related to the assessment and cleanup planning of brownfields, which the Environmental Protection Agency (EPA) defines as “real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.” Although the City may fund such assessments from other sources, this procurement was catalyzed by the 2021 award of a \$300,000 EPA Brownfields Assessment Grant in 2021. The contract serves as a master agreement, with work orders completed for specific projects as necessary and desirable.

Financial Implications:

The contract authorizes up to \$400,000 in expenditures at the City’s discretion; expenditures would principally be covered by the EPA Assessment Grant other dedicated brownfields funding, but could potentially be covered by departmental funds.
