LAND USE RECOMMENDATIONS

2035 Our Missoula Growth Policy

Summary of Residential Land Uses with associated typical zoning:

Residential Land Uses	Basic Description	Current Relatable Zoning
Residential Rural	Less than and including 1 du/2 acres	R215, R80, Cluster & Conservation option, OP2
Residential Low Density	Between 1 du/acre and 2 du/acre	R40, R20
Residential Medium Density	Between 3 du/acre and 11 du/acre	RT10, R8, R5.4, RT5.4
Residential Medium – High Density	Between 12 du/acre and 23 du/acre	RT2.7, RM2.7, RMH, R3
Residential High Density	Greater than 24 du/acres	RMI-35, RMI-45, RMI.5, RM0.5

Primarily Special Purposes, General:

Special purpose land use address land use patterns where major private development activity is discouraged due to constraints on the land and that complement the community's development activity with spaces like large parks, conserved lands, public facilities and large schools lands.

Parks and Open Lands:

Parks and Open Lands is designated for larger park areas that are in public ownership, larger common areas that are intended for use by a group of residents, or larger conservation lands that indicate a partnership between a public group and the private landowner. These areas are generally open in character and may or may not be developed for active recreational purposes. This category includes conservation easements which may not be open for public use. Small scale parks, common areas and conservation areas are considered a part of the fabric of general surrounding land uses and in that way are recognized but are not necessarily pin-pointed on the Future Land Use Map.

Public Quasi Public:

This designation is for land with structures or uses, such as schools, airport, community buildings, cemeteries and utility facilities. Land currently owned by public agencies or held in reserve for future development or public facilities also receive this designation. Federal

lands administered by the United States Forest Service (USFS), State owned lands administered by Fish, Wildlife and Parks (FWP), and conservation and recreation sites are also public lands but are designated Open and Resource or Parks and Open Lands.

Open and Resource:

This land use designation is intended to protect important resource land and areas of natural hazard while also recognizing that those lands may be within private ownership. Open and Resource fulfills several objectives including limiting development in areas where natural resources are present generally including the river corridor, drainages, riparian and wetland areas, wildlife corridors, floodplain along the primary water ways, steep hillside, and areas far from community services. Residential development is clearly intended as the secondary use of the land. While Open and Resource is not a residential designation, one dwelling per 40 acres may meet the intent of the classification in some cases if other Plan goals and policies are met. Any development that does occur should be grouped or clustered in order to minimize impacts to resources. Gravel extraction operations are considered a resource-based use. By state law, gravel extraction is allowed in all zoning districts except residential. Buffering from adjacent uses is essential if gravel extraction is explored within this designation.
