Email: campbelltl@ci.missoula.mt.us

Daytime Phone: 4068305455

Alternate Contact Phone: *Field not completed.*

Street Address: 1345 West Broadway

City, State: Missoula

Zip: 59802

Is your street address the same as your mailing address? Yes

Background

Do you live in City limits? Yes

How long have you been a city resident? 10 years

In which ward do you reside?	6
Are you a U.S. citizen?	Yes
Are you registered to vote?	Yes
Current Occupation:	Stormwater Utility Superintendent
Current Employer:	City of Missoula
If you'd like, you can attach a resume or other document for the City Council to consider.	<i>Field not completed.</i>
Briefly describe your educational background:	Bachelor's of Science in Natural Resources Management from Colorado State University; Master's of Science in Entomology from Montana State University
List of community service experience:	Water Quality Advisory Council member since 2019
What is your interest in serving on this board, commission, or committee?	I am interested in serving on the Energy and Climate Team because I want to help the City of Missoula successfully implement the forward-thinking goals identified in the Climate Action Plan. It is important that we not only address the causes of climate change but we must also ensure that our community is resilient to change.
Do you have any special knowledge, interest, or experience that would qualify you for a position on this board, commission, or committee?	I have nearly 20 years of environmental regulatory compliance experience and have dedicated my career to protecting water quality. I think it is important to have someone on the board who is knowledgeable about the Clean Water Act, our sole-source aquifer, and Missoula's unique hydrology. To create a more resilient community, we need someone on the board who can knowledgeably advocate for green infrastructure design principles (i.e., vegetation and wetlands to treat stormwater) that will protect our water resources, while mitigating for the effects of climate change. As a Certified Floodplain Manager, I also understand that we must anticipate and plan for the effects of larger and more unpredictable storm events, by protecting riparian areas and restoring floodplains.
