**Subject:** River View Subdivision

I am writing as a concerned homeowner adjacent to the proposed subdivision. I feel that the City Council needs to give serious consideration to the existing conditions on River Road, and the impact that adding an additional 19 homes would make. Not all council members may be aware that River Road is a main arterial between Reserve and Russell. It gets a lot of traffic and is almost totally without curbs and gutters. It is hazardous for the many children who walk, bike, and skateboard back and forth to Lafray Park and to the school buses, and to senior citizens trying to get exercise or access the bus line. In winter, when snow is plowed to the side, it is necessary to walk in the street. To proceed with this subdivision without first upgrading River Road would be irresponsible. I feel it is an accident waiting to happen as is, let alone with an additional 19 families.

I appreciate your consideration of this issue.
