**Background:**

Community Planning, Development, and Innovation planning staff have drafted amendments to Title 5 City Business Licenses and Regulations Ordinance in response to necessary maintenance items and the legalization of recreational (adult-use) cannabis in 2021. In order to accommodate

the resulting increase in the number of cannabis businesses and their unique nature, staff are proposing a new business license category for cannabis. The new business license type requires the addition of new definitions, general licensing provisions, application and issuance procedures, and license content requirements. Additionally, staff are proposing air quality mitigation requirements in order to protect the public health, safety and welfare of the community. The proposed ordinance reorganizes all Title 5 definitions for improved legibility and updates outdated process language. Staff will also present an update on cannabis cultivation energy regulation options.
