Subject: Fwd: riverfront trails subdivision

While I am opposed to telling owners what they can and can't do with their own property, I am opposed to changing a density zoning in an already dense area without regard to traffic flow or ingress and egress of the area during emergency situations, and impacts to residences closer to Missoula during peak traffic times, such as school getting out and quitting time at the end of the day. I feel more thought into traffic impact should be done before approving a density change for this area.

Thank you.
