Background and Alternatives Explored:

Vegetation must be maintained according to the U.S. Army Corps of Engineers standards to retain the accreditation status of, and flood protection provided by, the Clark Fork Levees: Levee III (north bank from Madison to Orange) and Levee V (north bank from California to Russell). The Stormwater Utility requested four bids from local tree service providers. One bid was received from Treasure State Tree Service. It is recommended that the City award the project to Treasure State Tree Service.

Financial Implications: \$45,360 from the **Stormwater Enterprise Fund**
