Title 12 Summary of Major Changes

Responsible Person	Code Section	Code Section Name	Description of Change	Reasoning for Change
Ross	Multiple sections	Multiple sections	Change Development Services Director to Public Works and Mobility Director	Re-organization of City Engineering back to PWM
				12.36 mainly deals with overhead poles and wires and does not address underground private utilities and the conflicts these
Ross	12.24.150	Requirements for Non-Municipal Utilities	Added language from recent franchise agreements.	private underground utilities can create with public uses of the ROW.
			Clarifies that asphalt penalties will be assessed at time of permitting rather than after the project is	
			complete. Also establishs an additional exception for asphalt penalties which is for water/sewer service	
Ross	12.24.140; 12.10.370	Asphalt Penalties	repairs.	
			Establishs criteria for ROW improvement postponements such as lack of public benefit, design timelines,	ROW improvements should not be required in all instances. Establishing a postponement process allows City staff to use best
Troy	12.10.110	Right-of-Way Improvement Postponements	adverse conditions, or an upcoming CIP projeject.	judgement.
			Increases max slope from 8-10% to 15% for driveways which are not fire access routes. Old standards were	
			based on fire access routes, which will still be 10% max. Driveways which are not fire access routes will now	
Troy	12.10.180; 12.17.080	Driveways/Approaches	have a 15% max.	Allows for more flexibility on steeper sloped parcels.
Troy	12.17.090	Parking Facility Construction Requirements	Changed parking facility criteria from 5 spaces to 4 spaces in order to trigger requirements.	This was a change in state building codes that we are now complying with.
Steve	12.24.045	Specifications for cutting of Portland Cement Concrete or Asphalt	Moved to PWM Manual, Section 2.6 or Appendix 2-A.	Technical specifications like this belong in the PW manual or in the City's Standard Modifications to MPWSS, not in Code.
		- 1600		
Steve	12.24.070	Backfilling sewer pipe bedding and subgrade requirements	Moved to PWM Manual, Section 3.6 or Appendix 2-A.	Technical specifications like this belong in the PW manual or in the City's Standard Modifications to MPWSS, not in Code.
Steve	12.24.080	Backfilling specifications of maerials for top six inhes of finish subgrade	Adopted with MPWSS	Tacknical angifications like this helpes in the DM manual or in the Cityle Chanderd Medifications to MDMCC not in Code
sieve	12.24.000	backinning specifications of maerials for top six fillies of fillish subgrade	Adopted with Mr W33	Technical specifications like this belong in the PW manual or in the City's Standard Modifications to MPWSS, not in Code.
Steve	12.24.090	Resurfacing specifications for Public Roadways	Moved to PWM Manual, Appendix 2-A.	Technical specifications like this belong in the PW manual or in the City's Standard Modifications to MPWSS, not in Code.
Sieve	12.27.030	nesarraeing specifications for Fubile Roadways	morea co i i i i manadi, rippenan z i i	recommend specimental size and serions in the city's standard modifications to fin 4935, not in code.
