**Background and Alternatives Explored:**

The construction materials indicated are essential for most street maintenance- and construction-related activities, including sand for snow operations; chips and emulsified asphalt for chip sealing; asphalt for paving, construction, and pothole patching; and drain aggregate for storm sewer maintenance. A comparison with bids from previous years are included on the bid tabulation document.

The Streets Division followed the City's Procurement Policy by conducting a bidding process for the materials.

**Financial Implications:**

Costs will be paid from the Street Division's annual budget.
