Cassie Tripard

City of Missoula Development Services 435 Ryman Street Missoula MT 59802

Re: Conditional Use Application – Hellgate Village West Townhomes

Dear Cassie:

As you are aware, in 2020, we submitted two phases of Townhome Conditional Use (TED) requests to Community Planning, Innovation and Development, the first phase, TED East, and the second phase, TED West. TED East was deemed sufficient and was approved and is nearly built out. This application is to provide the necessary information to allow for the completion of review of the TED West. The application and copy of the review fee check are from the original application of TED East and TED West. The new exhibits are the site plan and building plans and elevations. Lastly, when the application was made in 2020, we were under the jurisdiction of the 2015 Our Missoula Growth Policy. This has been augmented with the adoption of the Mullan Road Area Master Plan (Sxwtpqyen).

The goal of Hellgate Village West Townhomes is to provide market rate housing that is affordable for Missoula residents. The actual price of the dwelling units will be a function of the cost of labor and materials at the time the dwelling units come on the market. Affordability is also a function of design. The design for Hellgate Village accommodates a diverse range of housing types in a walkable neighborhood with connectivity to the adjoining neighborhoods. The proposed density falls within the recommendation of the City Growth Policy 2035 (adopted November 23, 2015) and aligns with the concept of "Build Inward."

The project received preliminary plat approval on October 7, 2019, and the final plat was filed on on July 16, 2020.

The conditional use complies with all applicable standards of the zoning ordinace B2-1 Community Business including the townhome development standards Ordinance 3609. The attached Conditional Use Application Packet serves to update and replace the placeholder application packet submitted previously, on July 31, 2020. Please contact us if you have any questions, 406-728-4611.

Sincerely, WGM Group, Inc.

Kate Dinsmore
Landscape Architect

B. SUBJECT PROPERTY INFORMATION

General location of subject property and address (if address has been assigned): East of Flynn Lane, south of Pleasant View Homes #3 and west of Hellgate Meadows

Legal Description - complete and unabbreviated: Lot 5, Hellgate Village Subdivision, S18, T13 North, R19 West, P.M.M.

Township, Range, Section(s): Section 18, Township 13 North, Range 19 West

Subdivision, Lot(s), Block(s): Hellgate Village Subdivision, Lot 5

Tract(s), COS#: **COS 4490**

Bearings & Distances Descriptions (if boundaries of proposed Conditional Use are not exactly the same as the boundaries of the property legally described above):

Geocode: 04-2200-18-2-02-02000

C. ZONING AND GROWTH POLICY INFORMATION

1. Complete the following table (where applicable, indicate Unzoned):

	Zoning	Current Land Use
Adjacent (North)	RT10 - Residential 10 (two-unit townhouse)	Residential
Adjacent (South)	B2-1 - Community Business	Undeveloped
Adjacent (East)	B2-1 Community Business	Residential
Adjacent (West)	C-RR3 - Residential	Residential

- 2. What is the current zoning of the property? **B2-1 Community Business**
- 3. What is the applicable comprehensive plan and land use designation for the property? This property is within the Neighborhood Mixed Use designation of Our Missoula Growth Policy 2035. This designation supports a mix of neighborhood-serving commercial uses and mediumhigh density. Within Our Missoula Growth Policy, residential medium-high describes a density in the range of 12 dwelling units per acre to 23 dwelling units per acre. Current relatable zoning districts to B2-1 (Community Business) are B1-1(Community Business), and M1R-2(Limited Industrial-Residential).
- 4. What is the conditional use requested? A conditional use is requested for Hellgate Village West Townhomes because there are ten or more total dwelling units. The property is currently zoned B2-1, Community Business. The City of Missoula Zoning Ordinance #3609, an amendment to the Municipal Zoning Code, Title 20, states that conditional use review and approval are required for Townhome Exemption Developments containing ten or more dwelling units in a 'B' District.

D. RESPONSES TO TITLE 20 ZONING ORDINANCE CONDITIONAL USE REVIEW CRITERIA

- 1. **Review Criteria.** Describe how the proposal meets the following review criteria. (Not all review criteria will apply in every case. Only the applicable review criteria need to be met.)
- a. Whether the conditional use complies with all applicable standards of the zoning ordinance. The conditional use is proposed to comply with all applicable standards of the zoning ordinance including the townhome development standards. The maximum number of dwelling units permitted within a B2-1 Community Business district is one dwelling unit per 1,000 square feet. A Development Agreement has been formalized with the City of Missoula which limits the residential development to a maximum of 14 dwelling units per acre with a maximum building height of 35 feet. There are 33 units proposed with Townhome Exemption Development #2.

which per the Development Agreement, would allow for 41 units. Each townhome unit is proposed to comply with the parcel and building standards and the more restrictive building height per the Development Agreement. As part of the overall site design, the development is proposed to be compliant with the road, pedestrian connections, and parkland area established with the Development Agreement.

A conceptual design has been provided as an attachment.

b. Whether the conditional use is in the interest of the public convenience and will not have a significant adverse impact on the general welfare of the neighborhood or community.

The proposed development promotes urban growth with a variety of housing types, including small lot single-family homes, carriage houses, and row houses, very similar to the neighboring developments. The Mullan Road area is one of the many active growth areas for housing and services in Missoula. The proposed density will be similar to that of the surrrounding neighborhoods. With a "build inward" focus, this development intends on providing affordable housing, with the option for owner occupied units.

Hellgate Elementary School serves as the social, educational, and activity focal point of the neighborhood. Several commercial businesses are located on or near Mullan Road. Both the school and the commercial businesses can be accessed via, walking, biking, or driving. A bus route is also accessible with the closest stops on Connery Way, in the Hellgate Meadows Subdivision.

The proposed development will extend Mary Jane Boulevard. Mary Jane Boulevard has been planned as an Urban Collector roadway, appropriate to serve the dense compact development supported by the Neighborhood Mixed Use land use designation in the the Our Missoula City Growth Policy 2035 and the B2-1 Community Business zoning district. This development will have a minimal impact on the Flynn Lane, Mary Jane Boulevard, England Boulevard, O'Leary Street and American Way corridors. With the road system in a grid pattern, traffic will be distributed onto multiple streets.

Sidewalks and common areas will also be provided within the development. The dwelling units will be oriented toward the street where applicable and when not fronting a street, the units will be oriented toward the common area.

c. Whether the conditional use is compatible with the character of the surrounding area in terms of site planning, building scale, and project design.

The proposed development will be compatibable with the character of the surrounding area. Pleasant View, to the north, exhibits a traditional neighborhood design with grid system roads, small parks and a large central neighborhood park. Pleasant View has both front loaded and alley loaded lots and consists of single-family dwellings, two-family and multi-family dwellings. Hellgate Meadows to the east is a traditional neighborhood with a range of uses, from single-family home to high-density multiple family homes, and commercial uses. The Hellgate Elementary School Area is located west, across Flynn Lane. New developments are currently being built south of the school which allow for higher density single-family housing. The development pattern proposed with this TED will be similar to that of the existing neighborhood by including single-family and two-family housing units, centralized common areas, on-street parking, boulevards with street trees, and sidewalks. Unit design will be similar to that found within Hellgate Meadows and Pleasant View. Lots adjacent to the common area will face the common area to provide a community connection.

d. Whether the conditional use has operating characteristics that are compatible with the surrounding area in terms of hours of operation, outdoor lighting, noise, and traffic generation.

The development proposed is residential. Surrounding developments are residential with commercial uses beyond those developments. All outdoor lighting will comply with the Missoula Outdoor Lighting Ordinance and be compatable with the Pleasant View and Hellgate Meadows developments.

Noise generated by the TED is expected to be within a normal residential character. With this TED located at the end of Mary Jane Boulevard, increased traffic is only expected to be from the residents or their invited guests. Residents in the surrounding neighborhoods may experience decreased traffic generated by this development once Mary Jane Boulevard connects to Mullan Road. The continuance and availabilty of the non-motorized system will also help alleviate traffic generated with this development.

e. Whether the conditional use will not have a significant adverse impact on traffic safety or comfort, including all modes of transport (non-motorized and motorized).

The TED development is not expected to have adverse impacts on traffic safety. Mary Jane Boulevard, a collector street will be extended with alley access to individual units. Sidewalk extensions will be provided on both sides of Mary Jane Boulevard. Common areas have been provided within the development. Each common area is connected to a public right of way via a sidewalk. The motorized and non-motorized improvements will connect to the neighboring developments and provide access to Hellgate Elementary and shopping and services along North Reserve. There is also bus service within a quarter of a mile. As mentioned above, adjacent developments may experience decreased traffic generated from this subdivision once Mary Jane Boulevard connects to Mullan Road.

2. Factors to be Considered.

Section 20.85.070(I) includes factors that City Council may consider in determining whether all applicable review criteria have been satisfied. These are listed below for reference.

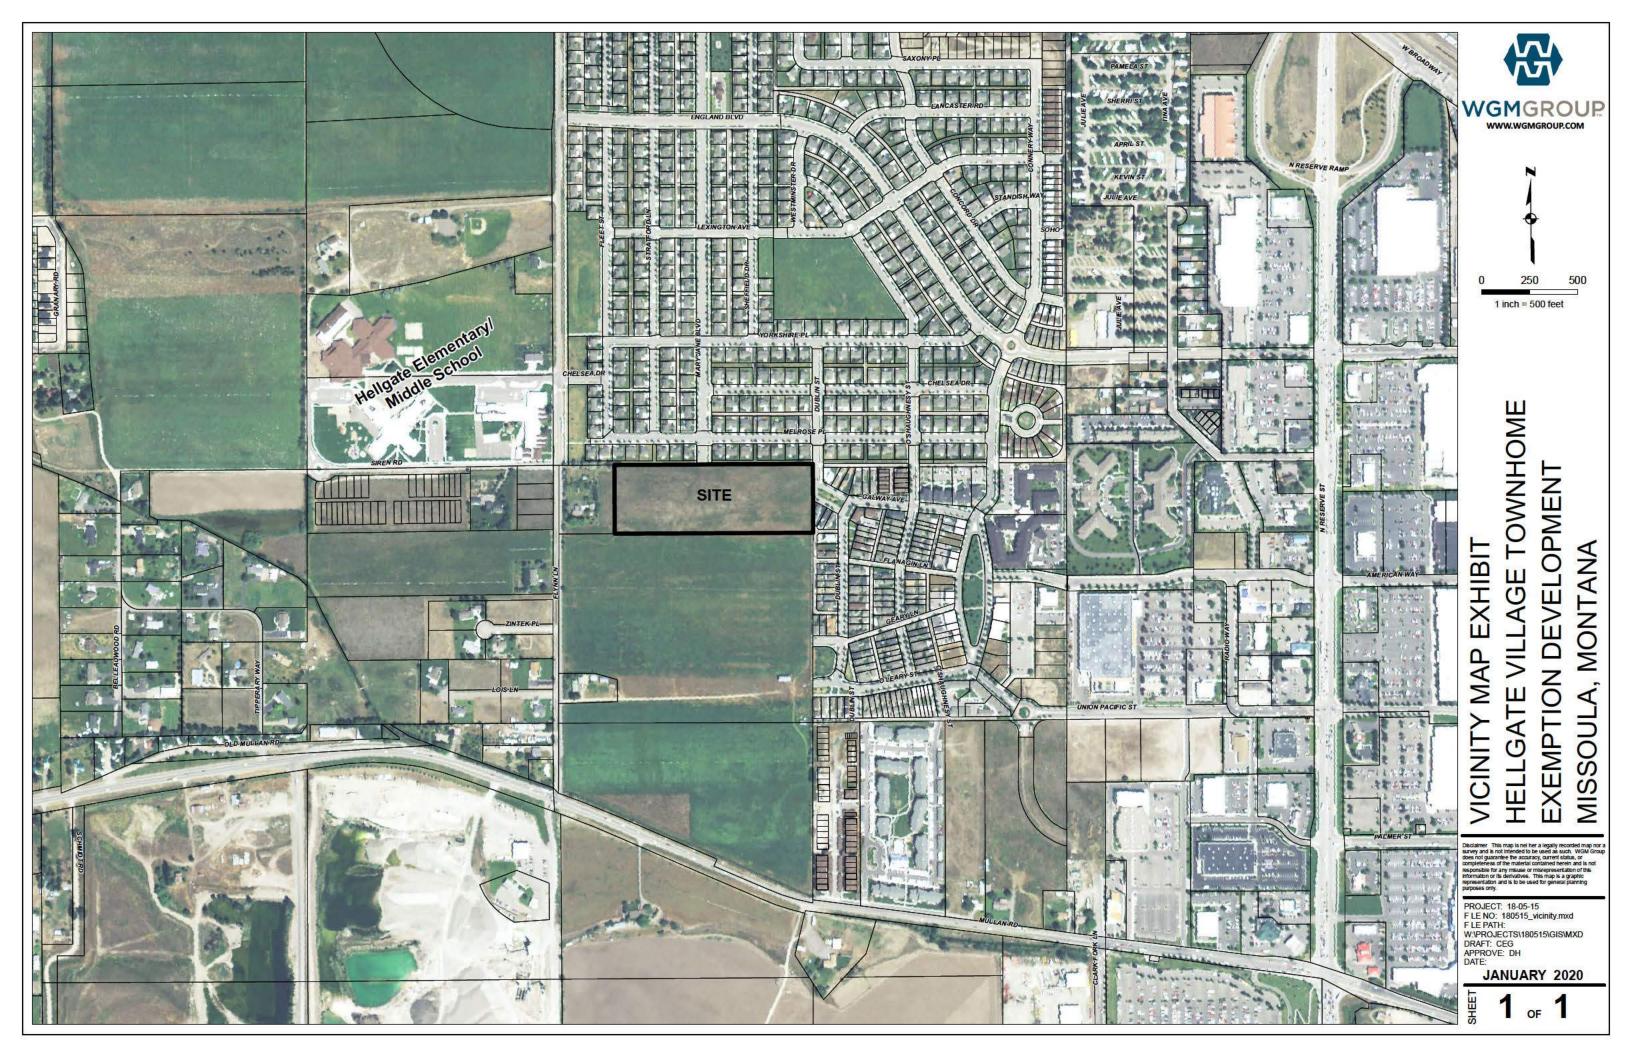

- a. That new buildings and structures are located to create a positive relationship with their environment, both urban and natural.
- b. That the site design properly addresses building orientation, open space, light, sun exposure, views, and protection of natural features.
- c. That buildings, structures, and uses are compatible with adjacent properties and uses in terms of physical design elements, such as volume and mass management, building materials, color, open space design, screening, and other design elements.
- d. That the overall project will be functional, attractive, and safe in terms of pedestrian, bicycle, and vehicular access, parking, loading, and servicing.

E. ATTACHMENTS

As separate attachments (8.5" x 11" or 11" x 17"), provide the following materials with the site clearly identified. Where appropriate, required information may be combined as long as the information is clearly presented. Please check the box if the material is included in the packet. If the material is not included in the submittal packet, please note "N/A".

- A cover letter describing the purpose of the proposed project, existing site conditions, and a brief description of the proposal.
- A vicinity map showing the subject property and the area within 300 feet of the subject property.
- A **Zoning map** of the subject property and vicinity (showing the existing zoning district), extending at least 300 feet from the property boundaries.
- An aerial photo of the subject property and vicinity extending at least 300 feet from the property boundaries.

	A Growth Policy/Comprehensive Plan map of the subject property and vicinity extending at least 300 feet from the property boundaries for the applicable comprehensive plan, clearly showing
	the land use designation of the subject property and surrounding properties.
\boxtimes	The current plat of the subject property.
\boxtimes	A site plan, including existing and proposed landscaping, parking, streets/access, sidewalks, bike
	lanes, and any other improvements to the property.
\boxtimes	Building elevation drawings of all proposed structures and/or photos of existing structures.
\boxtimes	Floor plans of all existing and proposed buildings.
