I had a client wanting to subdivide a parcel but the City would not schedule the subdivision meeting so as not to start the clock on the review. How is that being addressed in these changes?

If the subdivision is proposing a park but the Parks Department is demanding funds in lieu of accepting the park, yet the park is being provided how is the Parks Department being held accountable to the Citizen developer being taken advantage of by the City Department in these subdivision regulations?

Stop the madness! Not everyone and their mother needs to move to Missoula MT. My Northside neighborhood is unrecognizable from 30 years ago.
