Background and Alternatives Explored:

The City's Storm Water Utility was created in October 2016, and since that time, the utility has been working to identify areas that need additional focus in order to fully comply with state and federal storm water regulations. The utility realized that revisions to Chapter 13.27 are needed to ensure the City's Storm Water Utility is in compliance with its Municipal Separate Storm Sewer System (MS4) General Permit, which is administered by the Montana Department of Environmental Quality on behalf of the U.S. Environmental Protection Agency and in order to comply with The Clean Water Act of 1972. Changes to this chapter also address requirements for

storm water injection well (i.e., dry well or “sump”) permitting and operation to comply with the Safe Drinking Water Act of 1974, all with the goal of preventing the pollution of the Missoula Valley aquifer. This sole-source aquifer provides drinking water for Missoula Valley residents, including all Missoula Water customers.

Financial Implications:

None.
