Subject: Our Missoula 2045 Land Use plan

Hello City Council members --

Thank you for considering this near-final Our Missoula 2045 Land Use plan. It's exciting!

We at Climate Smart Missoula provided fairly extensive comments toward an earlier draft (comments sent Oct 31) and are pleased to see that a good portion of our input has been incorporated into the plan you are presently reviewing.

We do have 2 small but important suggested changes that we feel are important to once again put forward, as they may be easily incorporated in the final plan before adoption.

- Page 117. Implementation Action: Roles. City CPDI and City PWM are both listed but City Parks & Rec is not. Given the importance of our Urban Forest and parks to this plan, it seems valuable to include them here. We also noted in the govt to government column, Missoula Urban Transportation DIstrict (Mountain Line) was not included, and they could readily be added.
- Page 119. Implementation Actions A44 & A45 are identified as 5-9 years. Given the City's climate goals and existing Electrify Missoula campaign, developing standards around green building practices and incentives should be 1-4 year priorities for implementation within codes. With so many new buildings going up in the next decade, we need strategies to ensure this new development makes it easier, not harder, to meet Missoula's climate goals.

Thank you for considering these specific edits to what is a great plan all in all.

Amy Cilimburg and Abby Huseth
