Chapter 13.27 – Storm Water Management

September 2016

Chapter 13.27 is approved and the Storm Water Utility is established.

January 2017

New MS4 Permit (2017-2021) conditions become effective.

May 2019

MDEQ performed an audit of the Storm Water Program and found 27 violations of the City’s MS4 Permit.

2020

Fourth year of the permit

Chapter 13.27 is insufficient to obtain compliance with our MS4 Permit.
MS4 Permit Regulation Requirements

Minimum Control Measure 4: Construction Site Storm Water Management

**Plan Review Checklist** (Deadline-End of 2017)
Develop and implement for consistent reviews

**Inspection Frequency Protocol** (Deadline-End of 2017/18)
Develop and implement based on project priority

**Authority to Inspect** (Deadline-End of 2019)
Provide authority to inspect privately owned construction BMPs
Minimum Control Measure 5: Post-Construction Storm Water Management

**Performance Standards** (Deadline-End of 2017)
Adopt an ordinance or other mechanism to require post-construction storm water management controls

**Maintain Inventory** (Deadline-End of 2018/19)
Develop and maintain/update an inventory of all post-construction storm water management controls
Got BMPs?

- Inspections
- Accountability
- Compliance
- Clean Water
