Engage Missoula

I live directly east of this proposed 80' tall radio tower. I bought this land and built our house in 1995. One of the main reasons we built here was the unobstructive view of the surrounding mountains. Mormon Peak, Blue Mountain and Squaw Peak. This proposed 80' tower would be in a direct line of our mountain views. I believe this 80' tower will decrease the value of our property and affect future resale value. I will be contacting my Ward 5 City Council members to state my opposition to this conditional use request. I encourage all my neighbors who also will be affected by this 80' tower to do the same. Thanks--Bill Kostecky
