You don't often get email from hamster70@aol.com. [Learn why this is important](#)

My concern was not addressed in your FAQs: What is being done to slow down growth? All of your answers seems to be either resigned to the fact that Missoula has to grow or in favor of it "now nurses and our children cant live here, thats not the Missoula we want" (paraphrased). Well maybe for many people it is. I would like to see as much energy put into discouraging growth in Missoula as managing it. Growth is not good. It destroys our way of life and tears apart our community. Government cant stop growth but policies can be put into place that slows or discourages it. What has Missoula done along these lines? Thanks, A Hamilton
