Background and Alternatives Explored:

Missoula Water wishes to connect homes and businesses in the area to a newer, larger main and abandon approximately 2,859 feet of a combination of steel, kalmein, and cast iron main that is leaking. This contract funds the construction work and materials to complete the project.

The City's engineering consultant for the project, Territorial-Landworks, Inc. (TLI), completed a bid selection process. After completing the bid tabulation, TLI recommended the City award the project to Western Excavating as the low bidder.

Financial Implications:

Will be paid from Water Utility Funds.
