

I received Mr. Beardsley's letter, and then the letter from the city regarding the upcoming hearing/comment submission period. Last I looked, comments are allowed now through July 22, with the hearing in August. The city's link was relatively easy to access/register and would encourage everyone interested to make submissions.

While the traffic study feels the additional 'new vehicle trips' for phase I and II as proposed won't be a problem at the interstate junction (if a second southbound lane were added), I acknowledged my discontent with the possibility of the addition of 61 vehicles per hour for 24 hours (1458 NVTs/day) between Stonebridge and Expo Parkway accessing Grant Creek Rd with phase I and II as proposed; increasing to 104 vehicles per hour (5168 NVTs/day) with the proposed full build out! That seems ridiculous, and not part of the neighborhood plan as I see it.

I would be willing to provide some funds for a postcard reminder mailing if needed.

Thanks for your time in organizing yet another 'project'!

Sincerely,

Karen Wilson
