---

**Action Required:**

Adopt a resolution of the Missoula City Council amending the Engineering Fee Schedule to remove the SWPPP and Erosion Control Permits and establish the Storm Water Permit and Dry Well Approval.

**Recommended Motion(s):**

I move the City Council: Set a public hearing on September 14, 2020 on a resolution amending the Engineering Fee Schedule to remove the SWPPP and Erosion Control Permits and establish the Storm Water Permit and Dry Well Approval. **September 14, 2020** (Adopt/deny) a resolution amending the Engineering Fee Schedule to remove the SWPPP and Erosion Control Permits and establish the Storm Water Permit and Dry Well Approval.

**Timeline:**

Referral to committee:	August 10, 2020
Committee discussion:	August 12, 2020
Council action (or sets hearing):	August 17, 2020
Public Hearing:	September 14, 2020
Deadline:	N/A

**Background and Alternatives Explored:**

Previously, the City implemented the SWPPP permit and the Erosion Control permit for the Storm Water Utility. To comply with the Department of Environmental Quality (DEQ) requirements, these permits need to be removed and the City Council need to implement the proposed Storm Water Permit and Dry Well Approval instead. Without implementing these new items, the City could be at risk for fines issued by the DEQ.

The new Storm Water Permit will encompass all properties where new construction will be generating storm water runoff. A site management plan and post-construction site inspection will be required for each permit. If a dry well is being installed due to new construction, it will also need to be inspected for proper installation. This permit will need to be paid for through the Development Services department and listed in the Engineering Fee Schedule.
