In the 2021 winter newsletter, Mr. Jeremy Keene, sites that Missoula is expecting 40,000 more people. Since land south-north-east is played out, that leaves most development to the West. Those of us that purchased property have done so to maintain a small neighborhood atmosphere. Building high rise apartments and businesses is an affront to all that have put their life savings into a home. If development is needed, then we urge you to look at single homes. Keep Missoula's atmosphere as a small Montana City.

Thank you for your time.
